HiGHS cold
HiGHS + Benefit start
HiGHS + Density start
Experiment A · n=150
Returned incumbent (%)
Configured limit (s)
Experiment A · n=150
Mean available benefit
Configured limit (s)
Experiment A · known optima=150
Available shortfall to optimum (%)
Configured limit (s)
Experiment B · n=150
Returned incumbent (%)
Configured limit (s)
Experiment B · n=150
Mean available benefit
Configured limit (s)
Experiment B · known optima=116
Available shortfall to optimum (%)
Configured limit (s)
